SUMMARY

Motivated Computer Science student and aspiring Data Analyst with a strong foundation in algorithms and problem-solving (ICPC). Proficient in Python for data manipulation and web scraping using Pandas and BeautifulSoup. Experienced in simplifying complex technical concepts as a C++ Instructor. Eager to apply analytical skills and machine learning knowledge to drive data-driven insights. Currently enhancing expertise through the Digital Egypt Pioneers Initiative (DEPI) training.

EDUCATION

- B.Sc. in Computer Science**, High Future Institute for Specialized Technological Studies (GPA: 3.44) Jan '23 — Present
Cairo, Egypt
- Focused on core Computer Science fundamentals including Data Structures, Algorithms, and Object-Oriented Programming (OOP).
 - Gained a strong mathematical foundation through coursework in Linear Algebra, Probability, and Statistics, essential for Data Analysis and Machine Learning applications.
 - Actively applying theoretical knowledge through competitive programming (ICPC) and practical software projects.

EXPERIENCE

- Data science Track** Nov '25 — Jul '26
Digital Egypt Pioneers Initiative (DEPI) Cairo
- Mastered data analysis and visualization workflows using Python, Pandas, NumPy, and Matplotlib.
 - Developed automated data collection scripts using Web Scraping and APIs, integrated with SQL for database management.
 - Selected for an intensive scholarship by the Ministry of Communications (MCIT) to apply advanced data science techniques.

- C++ Instructor** Oct '25 — Present
ICPC Community @ Future Academy Cairo
- Instructed students in Advanced C++ and Data Structures & Algorithms to prepare for competitive programming contests.
 - Authored and designed custom algorithmic problems to simulate official contest environments and assess students' skills.

PROJECTS

- Smart Home Automation System**
- Developed an IoT-based home automation system using ESP32 and Arduino microcontrollers.
 - Programmed efficient C++ firmware for real-time sensor data processing and hardware control.
 - Implemented wireless connectivity to enable seamless automation and remote device management.

SKILLS

Data Analysis & AI Pandas, NumPy, BeautifulSoup (Web Scraping)
Programming Languages C++, Python, SQL, JavaScript
Tools & Version Control Git, GitHub, VS Code, Microsoft Excel
Soft Skills Problem Solving, Technical Training, Communication
Languages English
